How to Change Your Ford Password

This document will help you change your current or temporary Ford password.
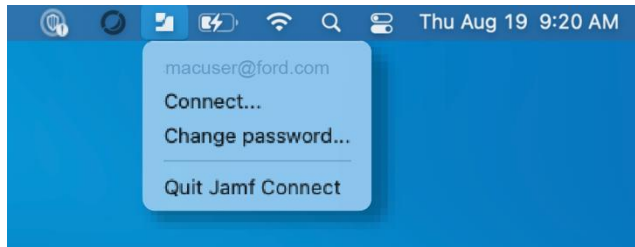

(1) Getting Started

What you'll need:
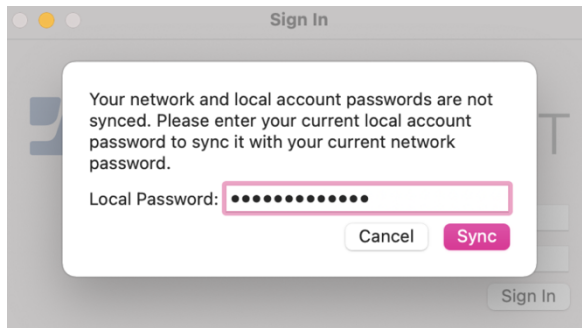

- Your Mac
- Wi-Fi
- Your Ford email and password

(2) Changing your Password

(A) Turn on and log into your Mac if you have not already.

(B) Click the JAMF Connect icon in the top menu bar of your Mac and click **Change Password**. This will open Ford's password manager website. Sign in with your current credentials. *This is the tool for changing your password on a Mac.*

(C) Click on the **Change Password** tab on the left-hand side. Create your new password following the guidelines on the page and then click **Change Passwords**.

(D) When the 'Password Changed Successfully!' pop-up appears, click **OK** and close the browser.

(E) Click the JAMF Connect Icon in the top menu bar again. Click Connect. Enter the **new** password you just created and click **Sign In**.

(F) When asked for the 'Local Password', enter your **old password** you just changed into the prompt and click **Sync**. *This will sync your Ford account to utilize your new password as your login for all Ford sites.*

You have successfully updated your password! You can now use your **new password** to sign into your Ford account for various resources.
